CAREER OBJECTIVE

A Developer with **7+ years of experience**, Dedicated to excelling in assigned responsibilities, I strive to iterate towards achieving the most suitable implementation for the underlying core. Enthusiastic about collaborating on diverse project ideas, I am eager to explore various technology domains and embrace different roles.

SUMMARY

7+ years of experience in the Information Technology industry as a **Full Stack Developer**.

- Proficient in **JavaScript frameworks, Typescript, libraries**, and assertion **testing tools**.
- Created scalable and robust **microservice backends** for **virtual platform, e-commerce** and **SAAS products**.
- Proficient in **Nodejs** for building **Rest APIs** and **test** writing in **selenium and playwright**.
- Ensured robust **code architecture, folder structure**, and **API documentation**.
- Implemented solutions for performance and **security** at **API, database, and server levels**.
- Led **database schema design** and **query optimization** efforts, resulting in improved performance and efficiency.
- Implemented real-time functionalities such as **WebSocket** sessions supporting up to 15k unique users, **one-on-one and group chat** capabilities, notifications, and user activity tracking.
- Developed responsive websites for **e-commerce, MOOC learning, hotel booking, fintech and travel platforms**.
- Created responsive **virtual platforms and virtual meta platforms and parallax scroll websites**.

WORK EXPERIENCE

Software Engineer , Emirates National Bank of Dubai (contract)

July 2025 - Present

- Utilized **Node.js, Angular, Playwright, MySQL** and **Redis**.
- Developed features for enhancing useability of app and user convenience.
- Optimized previous features and APIs for efficiency.
- Implemented **ISO standards** into banking features.
- Wrote automated tests for features using **playwright** to speed-up releases.
- Utilized **Jmeter** and **Playwright** for **API testing**

Senior Software Engineer , ZOHO Corp. Pvt. Ltd.

Sep 2022 - July 2025

- Utilized **JAVA, Ember, Node.js, MySQL** and **Redis**.
- Spearheaded the development of new features such as **dynamic threat reputation for threat alerts** and **automatic device configuration**.
- Updated the threat library by conducting **research and development** to identify and integrate resources from effective threat intelligence platforms, such as **AlienVault** and **BrightCloud**.
- Optimized **IP data retrieval** by implementing **Redis for fast and efficient IP searches** and associated data access.

- Played a pivotal role in optimizing **API performance**, **database query efficiency**, and **data modeling by implementing strategic indexing**.
 - Wrote tests for 3 months as a cross-platform tool training in an in-house automated testing tool **QEngine** built over **Selenium** and give an amazing performance.
-

Senior Software Developer, Doon Technology Experts

Apr 2018 - Aug 2022

- Led the end-to-end delivery of the **Travel company website** from requirement gathering to implementation, By Utilizing **ReactJs**, **MongoDB** and **NodeJs**. In doing so, I have used **Chrome Lighthouse** for monitoring purposes.
 - Used **MEAN stack** for a **Virtual Metaverse platform**. Utilized **Angular**, **Nodejs** and **MongoDB**. In backend developed a constraint check mechanism to manage up to **15,000 socket connections concurrently**, and made **notification and chat systems** to handle large number of users using **socket.io**.
 - Used **MERN Stack** for a **Virtual Retail Hosting platform**. Utilized **ReactJs**, **Nodejs** and **MongoDB**. **Building SAAS products with various roles and permissions**, ensuring secure and scalable solutions for diverse user needs. Also integrated an in-house developed **ScreenSharing tool**.
 - As a **Frontend developer** for a **E-commerce website**. Used **Angular** in it to create an e-commerce website for bottle product and made it as a **Parallax scroll website**.
 - As a **Fullstack developer** in an **Hotel booking website**. Used **Java**, **AngularJS** and **MongoDB** to build a **scalable microservice architecture** and smooth website for a hotel booking system. Also used **Kafka for notifications** and **websocket for chat system**.
 - As a **Fullstack developer** in a e-commerce app with **Django** as backend and **Angular** and Frontend.
-

ADDITIONAL INFORMATION

- **Technical Skills:** Angular, ReactJs, NodeJs, ExpressJs, Java, EmberJs, Socket.io, MongoDB, MySQL, Redis, ElectronJs, Django, VueJs, Playwright, Selenium.
 - **Languages:** English, Hindi
 - **Certificates:** Java Assessment completion from Learntube by Career Ninja, Javascript - Basic by Cutshort
 - **Awards/Activities:** Employee of the 2021-22 for outstanding performance and commitment(Doon Technology Experts)
-

DOMAINS

- **Banking**
- **SAAS Products (B2B)**
- **Tour & Travel Websites**
- **E-Commerce Websites**
- **Virtual Metaverse Platform**
- **Virtual Events Platform**
- **Virtual Retail Hosting Platform**
- **Hotel Booking Platform**

EDUCATION

Bachelor of Science

Jun 2012 - June 2015

H.N.B. Garhwal University

- Bachelors of Science (Physics, Maths, Geology)
