Full Stack Developer | Node.js, Angular, React | AI/LLM Integration | Banking & Fintech Systems

CAREER OBJECTIVE

Full Stack Developer with **7+ years of experience** building scalable backend systems, real-time applications, and **AI-driven solutions** across banking, SAAS, e-commerce, and virtual platform domains. Currently developing an **AI-powered banking chatbot** and **automated testing utilities** at Emirates NBD. Adept at translating business requirements into robust, **secure**, and **high-performing** technical implementations, with a strong record of cross-domain collaboration and ownership of solutions end-to-end.

SUMMARY

- **7+ years of experience** in the Information Technology industry as a **Full Stack Developer**.
- Currently developing an **AI-powered banking chatbot** at Emirates NBD, including **LLM training and fine-tuning** to function as a reliable, compliant banking agent.
- Built an **AI-driven chatbot testing utility** covering **motive-driven, scenario-based, mobile-UI, and pressure testing**, using AI to validate AI.
- Proficient in **JavaScript frameworks, TypeScript**, libraries, and **assertion testing tools**.
- Created scalable and robust **microservice backends** for **virtual platforms, e-commerce, and SAAS products**.
- Proficient in **Node.js** for building **REST APIs**, with test automation in **Selenium and Playwright**.
- Ensured robust **code architecture, folder structure, and API documentation**.
- Implemented solutions for **performance and security** at API, database, and server levels.
- Led **database schema design and query optimization** efforts, resulting in improved performance and efficiency.
- Implemented real-time functionalities such as **WebSocket** sessions supporting up to **15,000 unique users**, one-on-one and group chat capabilities, notifications, and user activity tracking.
- Developed responsive websites for **e-commerce, MOOC learning, hotel booking, fintech, and travel platforms**.
- Created responsive **virtual platforms, virtual metaverse platforms, and parallax scroll websites**.

WORK EXPERIENCE

Software Engineer (Contract), Emirates NBD, Dubai, UAE

Jul 2025 - Present

- Developing an **AI-powered banking chatbot** as a backend developer, **training and fine-tuning the underlying LLM** to function as a reliable, compliant, and conversational **banking agent**.
- Built an **AI-only chatbot testing utility** to validate chatbot behavior at scale, covering **motive-driven testing, scenario-based testing, mobile-UI testing, and pressure testing**.
- Utilized **Node.js, Angular, Playwright, MySQL, and Redis** to build and maintain banking application features.
- Developed features that enhanced app usability and overall user convenience.
- Optimized existing features and APIs for improved performance and efficiency.
- Implemented **ISO standards** into banking features to ensure regulatory and security compliance.
- Wrote automated tests using **Playwright** to speed up release cycles.
- Utilized **JMeter and Playwright** for API load and functional testing.

Senior Software Engineer, ZOHO Corp. Pvt. Ltd.

Sep 2022 - Jul 2025

- Utilized **Java, Ember, Node.js, MySQL, and Redis** to build and maintain enterprise security features.
- Spearheaded development of new features including **dynamic threat reputation** for threat alerts and **automatic device configuration**.

- Updated the threat library through research and development, integrating resources from threat intelligence platforms such as **AlienVault** and **BrightCloud**.
- Optimized **IP data retrieval** by implementing **Redis** for fast and efficient IP lookups and associated data access.
- Played a pivotal role in optimizing **API performance, database query efficiency, and data modeling** through strategic indexing.
- Completed 3 months of cross-platform testing training on **QEngine**, an in-house automated testing tool built on Selenium.

Senior Software Developer, Doon Technology Experts

Apr 2018 – Aug 2022

- Led end-to-end delivery of a travel company website, from requirement gathering through implementation, using **React.js, MongoDB, and Node.js**; used **Chrome Lighthouse** for performance monitoring.
- Built a **virtual metaverse platform** using the **MEAN stack** (Angular, Node.js, MongoDB); developed a constraint-check mechanism to manage up to **15,000 concurrent socket connections**, plus notification and chat systems using **Socket.io**.
- Built a **virtual retail hosting platform** using the **MERN stack** (React.js, Node.js, MongoDB) as a **SAAS product** with role-based permissions, ensuring secure and scalable solutions for diverse user needs; integrated an in-house screen-sharing tool.
- Developed an e-commerce website as a Frontend Developer using **Angular**, including a **parallax-scroll** design for a bottle product brand.
- Built a scalable **microservice architecture** for a hotel booking platform using **Java, AngularJS, and MongoDB**, with **Kafka** for notifications and **WebSocket** for real-time chat.
- Developed an e-commerce application as a Full Stack Developer using **Django** for the backend and **Angular** for the frontend.

ADDITIONAL INFORMATION

Technical Skills: Angular, React.js, Node.js, Express.js, Java, Ember.js, Socket.io, MongoDB, MySQL, Redis, Electron.js, Django, Vue.js, Playwright, Selenium, LLM/Chatbot Development

Languages: English, Hindi

Certificates: Java Assessment Completion — Learntube by Career Ninja; JavaScript - Basic — Cutshort

Awards: Employee of the Year 2021–22 — Doon Technology Experts, for outstanding performance and commitment

DOMAINS

- Banking & Fintech
- AI / LLM-Powered Chatbots
- SAAS Products (B2B)
- Tour & Travel Websites
- E-Commerce Websites
- Virtual Metaverse Platform
- Virtual Events Platform
- Virtual Retail Hosting Platform
- Hotel Booking Platform

EDUCATION

Bachelor of Science (Physics, Maths, Geology)

Jun 2012 – Jun 2015

H.N.B. Garhwal University
